- Slack, Skype

RECENT EXPERIENCE

Musora Media

October 2020 – January 2025

Lead Engineer: Front-End

- Led a team of frontend developers to deliver new web experiences across four brand channels: *Drumeo*, *Singeo*, *Pianote*, and *Guitareo*.
- Partnered with UX designers to translate Figma designs into performant, accessible, and maintainable features aligned with coding best practices.
- Created a component library and front-end design system with Tailwind CSS and Vue.js Components.
- Designed and implemented the company's Jira workflow, including project boards for functional teams in Product and Technology.
- Contributed as an individual developer on key initiatives, including:
 - **Unified Platform** – Consolidated four instrument platforms into one seamless user experience.
 - **Custom Playlists** – Enabled students to curate and organize content to match their learning preferences.
 - **Challenges** – Built short-form video lessons tailored for busy musicians.
 - **Musora Content Services** – Developed an NPM package enabling Mobile and Web teams to fetch structured content from Sanity.io.

Belk

January 2019 – December 2020

Software Engineer: Ecommerce

- Contributed to the development of new features within Belk's Salesforce Demandware environment.
- Assisted in creating a Vue component library for common UI elements, enhancing consistency across the platform.
- Refactored the team's existing CSS to use a modular architecture which minimized visual regressions when shipping new features.
- Assisted in leading the team through daily stand-ups and improving our Jira process to remove friction across teams.
